

In the coating industries, environmental factors can drastically hinder the progress of a project. Many coating operations have to cease temporarily when humidity is too high and overall time and costs will increase as a result.

STABILIS MAX coatings series is able to limit the impact of work stoppages for a wide variety of projects, including offshore, marine and industrial applications due to its **surface and moisture tolerant** nature. Hence, it is able to increase the coating application window range, thereby increase the coating efficiency of the respective projects.

STABILIS MAX

- 2K Pure Epoxy Coating
- Low VOC, Ultra High Solid
- Excellent Adhesion to Wet Surfaces
- Cures Underwater
- Excellent Anti-Corrosion Resistance
- Reduces work stoppages incidence
- Surface & Moisture Tolerant
- Suitable for HydroJetting/Blasting surfaces
- Multi-Purpose / Universal Primer System

APPLICATION AREAS

- Universal Primer for vessels
- Splash Zones
- Marine Buoys
- Transformers
- Submersible Pumps
- Offshore structure
- Valves
- Risers
- Manholes
- Tanks
- Pipelines

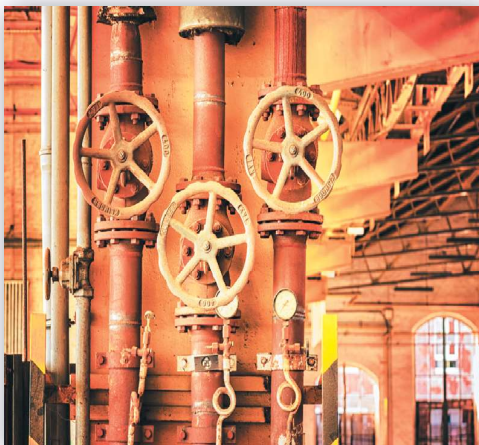

STABILIS MAX GF

- 2K Pure Epoxy Glassflake Coating
- High Build Solventless Coating
- Excellent Adhesion to Wet Surfaces
- Cures Underwater
- Excellent Anti-Corrosion Resistance
- Reduces work stoppages incidence
- Surface & Moisture tolerant
- Excellent impact and abrasive Resistance
- Suitable for HydroJetting/Blasting surfaces

APPLICATION AREAS

- Helidecks
- Splash Zones
- Tanks
- Marine Buoys
- Transformers
- Submersible Pumps
- Valves
- Risers
- Manholes
- Offshore Structure
- Pipelines (internal & external)

DISTRIBUTOR IN SINGAPORE :

SUN HAI ENGINEERING & TRADING.
